PROFESSIONAL SUMMARY

Software Engineer with 2+ years of professional experience building Java/Spring Boot services, React/TypeScript applications, REST APIs, and cloud data workflows. Experienced with Git, SQL, Docker, CI/CD, debugging, and Agile delivery in enterprise environments.

EXPERIENCE

- | | |
|--|---|
| Software Engineer
<i>Cisco</i> | July 2024 – Present
<i>San Jose, CA</i> |
| <ul style="list-style-type: none">- Built a containerized Java/Spring Boot service that converts Microsoft Entra ID account data into network-access rules for enterprise devices, using REST APIs, concurrent processing, validation, and failure recovery.- Created and supported React/TypeScript administrative tools and Java services used by customers to configure network policies; resolved customer-reported issues across the frontend and backend.- Raised unit and automation test coverage in a 10-year-old codebase from 30% to 95% using JUnit, test doubles, and AI-assisted test generation while preserving code-review standards. | |
| Software Engineer Intern
<i>Paramount</i> | June 2023 – August 2023
<i>San Francisco, CA</i> |
| <ul style="list-style-type: none">- Built a React analytics dashboard that exposed viewer-retention and regional engagement trends across 5,000+ Paramount+ titles to product and content teams.- Developed a containerized Python ingestion job that moved 100+ GB of nightly BigQuery data into a CMS; optimized SQL schemas to reduce storage and query overhead. | |
| Software Engineer Intern
<i>Robert Half</i> | June 2022 – April 2023
<i>San Ramon, CA</i> |
| <ul style="list-style-type: none">- Led development of a reusable multi-step web application framework in React, Redux, and TypeScript for customer-facing forms on roberthalf.com.- Added Jest tests and delivered production fixes through Git and Jenkins CI/CD, reducing the legacy Drupal/PHP backlog by more than 50%. | |

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, PHP, C
Frameworks: Spring Boot, React, Redux, Node.js, Django, Jest, JUnit, REST APIs
Cloud/Tools: Git, Docker, Jenkins, Jira, Linux, Google Cloud, BigQuery, PostgreSQL, MySQL, Redis
Practices: Agile/Scrum, CI/CD, unit testing, code review, debugging, object-oriented design, microservices

PROJECTS

- | | |
|---|------|
| Network Access Policy Service <i>Java, Spring Boot, REST, Docker, SQL</i> | 2026 |
| <ul style="list-style-type: none">- Built a standalone project based on Cisco identity workflows that validates employee account data and determines the appropriate network-access policy.- Added Docker setup, readable error logs, API tests, and SQL audit records so failed requests could be reproduced and fixed quickly. | |
| Multi-Threaded HTTP Server <i>C, Linux</i> | 2024 |
| <ul style="list-style-type: none">- Implemented a configurable worker pool, request scheduling, and file locks to serve concurrent requests while preserving atomic file writes. | |

EDUCATION

University of California, Santa Cruz <i>Bachelor of Science in Computer Science</i>	Santa Cruz, CA <i>June 2024</i>
