PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable services, telemetry pipelines, analytics products, and ML-assisted reliability tooling. Strong in Python, SQL, Java, BigQuery, Docker, distributed systems, observability, and data quality automation.

EXPERIENCE

- | | |
|--|---|
| Software Engineer
<i>Cisco</i> | July 2024 – Present
<i>San Jose, CA</i> |
| <ul style="list-style-type: none">- Built a multi-threaded Java/Spring Boot service that processes device and employee identity data used to enforce network policies across enterprise environments; added logs, validation, and failure recovery.- Expanded unit and automation test coverage from 30% to 95% in a mature platform, improving release confidence and reducing CI resource consumption.- Developed a PyTorch classifier and Python data-preparation workflow to identify invalid device records before policy evaluation, reducing avoidable support cases. | |
| Software Engineer Intern
<i>Paramount</i> | June 2023 – August 2023
<i>San Francisco, CA</i> |
| <ul style="list-style-type: none">- Built a React analytics dashboard that exposed viewer-retention and regional engagement trends across 5,000+ Paramount+ titles to product and content teams.- Developed a containerized Python ingestion job that moved 100+ GB of nightly BigQuery data into a CMS; optimized SQL schemas to reduce storage and query overhead. | |
| Software Engineer Intern
<i>Robert Half</i> | June 2022 – April 2023
<i>San Ramon, CA</i> |
| <ul style="list-style-type: none">- Led development of a reusable multi-step web application framework in React, Redux, and TypeScript for customer-facing forms on roberthalf.com.- Added Jest tests and delivered production fixes through Git and Jenkins CI/CD, reducing the legacy Drupal/PHP backlog by more than 50%. | |

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, TypeScript, C, C++
Data/ML: BigQuery, PostgreSQL, MySQL, Pandas, NumPy, PyTorch, data pipelines, ETL/ELT, data validation
Cloud/Tools: Google Cloud, Docker, Git, Jenkins, Linux, Jira, Redis, REST APIs
Engineering: Distributed systems, observability, CI/CD, unit testing, troubleshooting, Agile/Scrum

PROJECTS

- | | |
|--|------|
| Device Data Quality and Anomaly Detector <i>Python, PyTorch, Pandas, SQL</i> | 2026 |
| <ul style="list-style-type: none">- Built a data-quality project based on Cisco device-classification work that flags incomplete or unusual records before they reach downstream systems.- Generated repeatable accuracy reports, grouped common failure types, and exported SQL-ready results so engineers could investigate problems. | |
| Multi-Threaded HTTP Server <i>C, Linux</i> | 2024 |
| <ul style="list-style-type: none">- Built a concurrent HTTP file server with worker scheduling and custom locking to preserve atomicity under parallel traffic. | |

EDUCATION

University of California, Santa Cruz <i>Bachelor of Science in Computer Science</i>	Santa Cruz, CA <i>June 2024</i>
