PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience developing, testing, deploying, and supporting business applications. Hands-on with Java, Python, SQL, REST APIs, Git, CI/CD, debugging, secure integrations, and technical documentation in Agile teams.

EXPERIENCE

Software Engineer <i>Cisco</i>	July 2024 – Present <i>San Jose, CA</i>
- Developed and supported Java/Spring Boot services and React interfaces for enterprise network-access products, resolving customer-reported defects across backend and frontend systems. - Built a Dockerized REST integration that validates Microsoft Entra ID account data before distributing approved network policies, with audit logs and clear error handling. - Increased unit and automation test coverage from 30% to 95%; documented repeatable test and code-review workflows that shortened bug resolution time by 30%.	
Software Engineer Intern <i>Paramount</i>	June 2023 – August 2023 <i>San Francisco, CA</i>
- Built a React analytics dashboard that exposed viewer-retention and regional engagement trends across 5,000+ Paramount+ titles to product and content teams. - Developed a containerized Python ingestion job that moved 100+ GB of nightly BigQuery data into a CMS; optimized SQL schemas to reduce storage and query overhead.	
Software Engineer Intern <i>Robert Half</i>	June 2022 – April 2023 <i>San Ramon, CA</i>
- Led development of a reusable multi-step web application framework in React, Redux, and TypeScript for customer-facing forms on roberthalf.com. - Added Jest tests and delivered production fixes through Git and Jenkins CI/CD, reducing the legacy Drupal/PHP backlog by more than 50%.	

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, TypeScript, PHP, C
Frameworks: Spring Boot, React, Redux, Django, Node.js, Jest, JUnit, REST APIs
Tools/Data: Git, Jenkins, Docker, Jira, Linux, PostgreSQL, MySQL, BigQuery, Redis
Practices: Agile, SDLC, CI/CD, software testing, debugging, release support, documentation, code review

PROJECTS

Secure Subscription Billing API <i>Python, Django, Stripe, SQL</i>	2020
- Developed a REST API that automated recurring invoices for fleet-management customers and integrated Stripe payment workflows with authenticated endpoints. - Applied input validation, database transactions, and idempotent request handling to protect billing records and simplify troubleshooting.	
Multi-Threaded HTTP Server <i>C, Linux</i>	2024
- Implemented concurrent request handling, worker scheduling, and custom file locks while preserving file integrity under load.	

EDUCATION

University of California, Santa Cruz <i>Bachelor of Science in Computer Science</i>	Santa Cruz, CA <i>June 2024</i>
