PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience shipping Python and Java services, ML-assisted quality tools, cloud data workflows, and production APIs. Skilled in Python, SQL, PyTorch, AWS, Google Cloud, Docker, architecture, automated testing, and end-to-end feature delivery.

EXPERIENCE

Software Engineer <i>Cisco</i>	July 2024 – Present <i>San Jose, CA</i>
- Built a Dockerized Java/Spring Boot service that converts Microsoft Entra ID identity data into network-access policies using REST APIs, concurrent processing, validation, and recovery paths. - Developed a PyTorch classifier and Python data pipeline that identify invalid device records before downstream policy evaluation and generate explainable quality reports. - Owned implementation, testing, review, and release support for customer-facing services; increased automated coverage from 30% to 95%.	
Software Engineer Intern <i>Paramount</i>	June 2023 – August 2023 <i>San Francisco, CA</i>
- Built a React analytics dashboard that made viewer-retention and regional engagement trends understandable across 5,000+ Paramount+ titles. - Developed a containerized Python ingestion job that moved 100+ GB of nightly BigQuery data into a CMS and optimized SQL schemas for faster analysis.	
Software Engineer Intern <i>Robert Half</i>	June 2022 – April 2023 <i>San Ramon, CA</i>
- Built a reusable multi-step web application framework in React, Redux, and TypeScript for customer-facing forms on roberthalf.com. - Added Jest tests and shipped production fixes through Git and Jenkins CI/CD, reducing the legacy Drupal/PHP backlog by more than 50%.	

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, C++, JavaScript, TypeScript
AI/Data: PyTorch, Pandas, NumPy, machine learning, LLM applications, BigQuery, PostgreSQL
Cloud/Web: AWS, Google Cloud, Docker, Spring Boot, React, REST APIs, Redis, Linux
Engineering: System design, data pipelines, CI/CD, unit testing, debugging, code review, Agile

PROJECTS

Cloud ML Decision-Support Service <i>Python, PyTorch, AWS, Docker, SQL</i>	2026
- Built a cloud-hosted ML service related to Cisco device validation that scores incoming records and exposes results through a versioned API for engineering review. - Added batch ingestion, confidence reporting, automated model checks, and deployment documentation to move the prototype toward production use.	
Telemetry Data Quality Monitor <i>Python, Pandas, SQL</i>	2025
- Created validation rules and trend reports that surface incomplete data, common failure patterns, and downstream processing risk.	

EDUCATION

University of California, Santa Cruz <i>Bachelor of Science in Computer Science</i>	Santa Cruz, CA <i>June 2024</i>
