PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building React/TypeScript interfaces and LLM-powered product features. Strong in real-time streaming UX, prompt engineering and evaluation, REST APIs, Go/Python backends, and shipping reliably inside strict compliance guardrails.

EXPERIENCE

Software Engineer July 2024 – Present

Cisco

- Built React/TypeScript administrative workflows with real-time streaming updates for enterprise policy configuration and troubleshooting.
- Developed an LLM-assisted support tool using prompt engineering, response evaluation, and tool calling that helped engineers diagnose policy issues faster.
- Extended Java/Go backend services and raised automated test coverage from 30% to 95%, shipping safely in a security-sensitive, regulated environment.

Software Engineer Intern June 2023 – August 2023

Paramount

- Built a React analytics dashboard that made viewer-retention and regional engagement trends understandable across 5,000+ Paramount+ titles.
- Developed a containerized Python ingestion job that moved 100+ GB of nightly BigQuery data into a CMS and optimized SQL schemas for faster analysis.

Software Engineer Intern June 2022 – April 2023

Robert Half

- Built a reusable multi-step web application framework in React, Redux, and TypeScript for customer-facing forms on roberthalf.com.
- Added Jest tests and shipped production fixes through Git and Jenkins CI/CD, reducing the legacy Drupal/PHP backlog by more than 50%.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, Go (familiar)

Frontend: React, React Native (familiar), Redux, streaming UX, conversational UI

AI: Prompt engineering, LLM evaluation, RAG, tool calling

Backend/Tools: REST APIs, Node.js, Docker, Git, CI/CD, Jest

PROJECTS

Engineering Knowledge Agent (Cisco project) | *React, TypeScript, Python, RAG* 2026

- Built an AI assistant for Cisco policy troubleshooting that streams cited, step-by-step guidance retrieved from runbooks and device context.
- Added retrieval tests, answer-quality evaluations, and fallback behavior to keep responses accurate and traceable.

Multi-Threaded HTTP Server (UCSC project) | *C, Linux* 2024

- Implemented a configurable worker pool, request scheduling, and file locks to serve concurrent requests while preserving atomic file writes.

EDUCATION

University of California, Santa Cruz

Bachelor of Science in Computer Science

June 2024
