PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building backend services in TypeScript/Node.js and Java, with deep hands-on identity work across SSO, OAuth2/OpenID Connect, SAML, and directory synchronization. Strong in REST APIs, SQL/NoSQL, AWS, RBAC, Terraform, and Kubernetes.

EXPERIENCE

Software Engineer July 2024 – Present

Cisco

- Built a TypeScript/Node.js and Java/Spring Boot service that syncs Microsoft Entra ID identity data into access-policy systems, with OAuth2/OIDC, SCIM-style lifecycle handling, and audit logs.
- Implemented RBAC authorization models and SSO/SAML integrations for enterprise customers managing network access at scale.
- Raised test coverage from 30% to 95%; operated services on AWS with Docker, Kubernetes, and Terraform-managed infrastructure.

Software Engineer Intern June 2023 – August 2023

Paramount

- Built a React analytics dashboard that made viewer-retention and regional engagement trends understandable across 5,000+ Paramount+ titles.
- Developed a containerized Python ingestion job that moved 100+ GB of nightly BigQuery data into a CMS and optimized SQL schemas for faster analysis.

Software Engineer Intern June 2022 – April 2023

Robert Half

- Built a reusable multi-step web application framework in React, Redux, and TypeScript for customer-facing forms on roberthalf.com.
- Added Jest tests and shipped production fixes through Git and Jenkins CI/CD, reducing the legacy Drupal/PHP backlog by more than 50%.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL

Identity: OAuth2, OpenID Connect, SAML, SSO, SCIM, RBAC/ABAC, Entra ID / Active Directory

Backend: Node.js, REST APIs, PostgreSQL, Redis, NoSQL

Infra: AWS, Terraform, Kubernetes, Docker, CI/CD

PROJECTS

Enterprise Identity Sync and Access Control Service (Cisco project) | *TypeScript, Node.js, OAuth2, PostgreSQL* 2026

- Built a service that synchronizes directory users and groups into policy stores, handling provisioning lifecycle, deprovisioning, and conflict resolution.
- Added RBAC enforcement, OIDC login flows, structured audit trails, and integration tests covering failure and retry paths.

Multi-Threaded HTTP Server (UCSC project) | *C, Linux* 2024

- Implemented a configurable worker pool, request scheduling, and file locks to serve concurrent requests while preserving atomic file writes.

EDUCATION

University of California, Santa Cruz

Bachelor of Science in Computer Science

June 2024
